LICENSE#

**Schedule due date if less than two weeks.**

- ~ Please pour alginate impressions in stone.
- ~ Silicone impressions can be shipped and we will pour them for a fee.
- ~ We do not accept digital scans but we do fabricate appliances on 3-D printed plastic models that you provide. .
- ~ Enclose completed prescription slip with your signature and license number. It would be helpful if you include a business card to insure the correct information for shipping, billing, and phone number if we have any questions regarding your case.

We will return your case using UPS and enclose lab slips and a UPS return label for your next case.

Please check the models before shipping. Although some distortions are not detectable we will call if we notice any obvious problems before we construct the appliance to avoid unnecessary remakes. Check 3-D models for voids and make sure you have printed all areas needed for the type of appliance you want, especially distal of second molars and the palate if needed on the upper and lingual vestibule on the lower.

**Questions? Or to request a price list or printable UPS return label call or email**
